LANGUAGES/ FRAMEWORKS

HTML/CSS Javascript

Python Jest

Node.Js React

PROFILE

As a dedicated full-stack web development student at Atlas School, I'm fully immersed in the intricacies of software engineering. My background spans military service to entrepreneurial ventures, ingraining in me a resilience that's vital in tech. My journey has been fueled by a deep-seated enthusiasm for the transformative power of technology, particularly AI, and a commitment to keeping my family at the forefront of this digital evolution. Currently, I'm channeling my drive into developing a personal website and exploring e-commerce through a dropshipping site. With graduation on the horizon, I'm excited to navigate the tech industry's flexible opportunities, aiming to blend remote work and freelance ventures with family time.

PROJECTS

Chuy's Handyman & Remodeling Website

Aug 2023

Associated with Chuy's Handyman Services & Remodeling LLC

Taking on my first solo Website design for a company i've worked for previously.

Skills: ClipChamp · Commercial Photography · Google Maps API · Bootstrap (Framework) · JavaScript · Cascading Style Sheets (CSS) · HTML

Holberton Hacksprint

Aug 2023

Associated with Holberton School Tulsa

Holberton Tulsa Hack Sprint. The theme is "Breakfast" so we are making a web site modeled after meal kit delivery services like Hello fresh, Blue Apron, and Home Chef, except our company delivers in a post zombie apocalypse world.

Skills: Google Maps API · Bootstrap (Framework) · JavaScript · Cascading Style Sheets (CSS) · HTML
